Basket Coil Adapter Type D 300 B

- with quick release
- easy handling
- double insulated
- high-quality material

Article no.: 45400

From own production for wire coils according to DIN EN ISO 544:2011-06
EN ISO 544:2011 (D)

Type	Short term	Outside Ø	Inside Ø	Outer width
Basket coil adapter (B)	B 300	300 $\begin{smallmatrix} 0 \\ .5 \end{smallmatrix}$	180 ± 2	100 ± 3

Basket Coil Adapter Type D 400-210

- with quick release
- easy handling
- double insulated
- high-quality material

Article no.: 45600

From own production for wire coils B400 – width 210 mm

Type	Short term	Outside Ø	Inside Ø	Outer width
Basket coil adapter (B)	B 400	400 $^{+3}_{-5}$	180 - 3	210

Basket Coil Adapter K70/100/103/108

Article no.: 33045

Lock rods

Article no.: 33038	blue	for 70 mm coil width
Article no.: 33039	red	for 100 mm coil width
Article no.: 33040	green	for 103 mm coil width
Article no.: 33041	yellow	for 108 mm coil width

The basket coil adapter K70/100/103/108 of own production is characterised by an easy handling. The use of the established lock rods guarantees a secure fit of the wire coil. Thus a fast change of the wire coil is possible and the set-up times are enormously shortened.

Basket Coil Adapter Type 1 with 2 lock rods

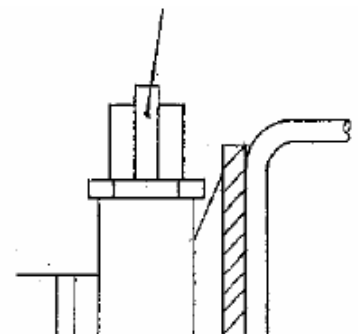

Type 1

Lock rod snapped in
Locked

Lock rod open

Article no.: 33025

- from own production
- easy handling
- high true running accuracy
- stable because of 8 arms
- secure fit of the wire coil because of the lock rods

Reel Hub Assembly, large Type 1

(for reels up to 30 kg)

- out of our own production
- short-term delivery times
- fixing by a M16 screw thread with screw M16
- reinforced construction for reel weights up to 30 kg

Article no. :33065

Reel Hub Assembly Type 1

(For reels up to 40 kg)

- from own production
- fastening by a M16 screw thread with screw M16
- reinforced design for a coil weight up to 40 kg
- with prolonged aluminium insert
- for basket coil adapters D400-210

Article no.: 33064

Recommended installation

- coil slightly inclined to the mounting
- coil maximum horizontally
- a load by weight of the locking nut is to be avoided

Reel Hub Assembly Type Europa

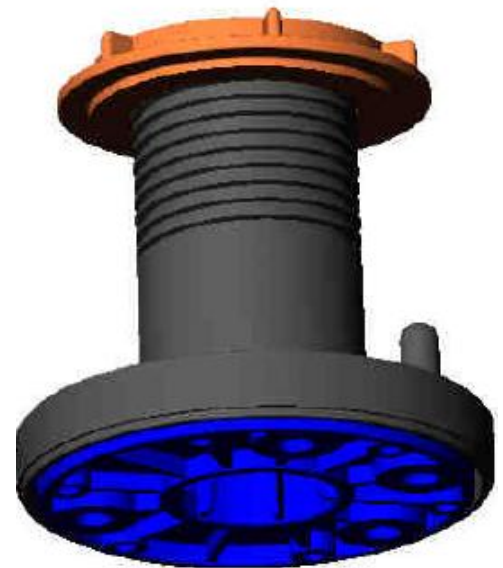

Model large

Model small

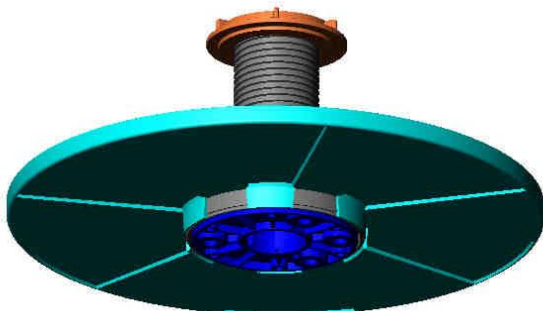

Article no.: 33047

The reel hub assembly type Europa is available in two models, small and large. Because of its long thread the application is very flexible and the reel hub assembly offers tension variations for coils with different widths. Combined with our insulating flange which was developed especially for this product the reel hub assembly type Europa provides an electrical protection to the housing.

Article no.: 33060

Reel Hub Assembly Type Europa large, with lock ring

Article no.: 33048

Due to risk assessment in different applications we are able to offer additionally the reel hub assembly Europa large with lock ring. The screw nut is held by a slight block. The handling is not affected. By further development the security is increased by dropping off of the wire coil.

Reel Hub Assembly with safety catch, large

Article no. 46000

Push safety catch there

Example of use:

Basket coil adapter type 1, article no. 33025

Insulating flange,

Insulating flange,

article no. 33056 blue

article no. 33055 red

The reel hub assembly with safety catch is characterised by a nut which is self-locking by the patent lock. The reel hub assembly can be used especially there, where freewheeling rolls are fixed on robots or machines. Since the nut is self-locking by the circumferential notches on the exterior of the reel hub assembly, we recommend also the use in case of cases with instable side covers.

Combined with the insulating flange you have new possibilities in case of new developments. An electrical insulation is ensured by the insulating flange towards the device side in case of repairing exchanges.

Brakes are consumables! If the welding machine is in use every day the brake must be replaced with a new one every two years at the latest.
